

Introduction – Gamoria: The Cyber Dungeon Quest

In the magical kingdom of **Gamoria**, peace has been shattered. Once ruled by wisdom and light, the throne now belongs to **King Kharl**, a dark sorcerer who has merged forbidden magic with digital powers. Rumors say he has allied with **NullCore**, a rogue AI that watches the kingdom through enchanted portals, ready to strike at anyone who dares challenge him.

The people of Gamoria whisper of a prophecy: only a **team of legendary heroes** can restore balance.

- **Dr. Karen**, master of magical ciphers and arcane codes, protector of hidden knowledge.
- **Mr. Leo**, stealthy rogue, expert in secret paths and forest mazes.
- **Warbro (Mr. Warner)**, the trickster who hides treasures and secret passages.
- **Sister**, the mystical Admin, the unseen guide who keeps the heroes on track.

You, the apprentice, are summoned to Gamoria. Your quest is clear: traverse **ten enchanted dungeon cards**, solve each challenge, uncover the flags, and stop King Kharl before he corrupts the kingdom completely.

The first task lies in **Dr. Karen's Mystic Repository**, hidden high in the towers of **Aurelia**, where knowledge of both magic and cyber secrets is stored. The towers pulse with arcane light, yet King Kharl's dark magic has scrambled her digital scrolls across the mortal realm.

Sister leans close and whispers:

"The first key lies with a legendary mind who dreamed of machines before they existed.

Only by finding this knowledge will the rune glow and reveal the path ahead."

With a flash of emerald light, the portal to **Dr. Karen's Labyrinth of Alarms** awaits...
